PROFESSIONAL SUMMARY

Full Stack Developer specializing in Laravel and React/Next.js, with hands-on experience building complex web applications, RESTful APIs, relational database systems, and real-time applications. Experienced in backend architecture, business logic, authentication and authorization, database design, and system integration. Worked as the primary backend developer at NMO LLC, contributing to requirements analysis, technical solution design, client communication, and backend development.

PROFESSIONAL EXPERIENCE :

FullStackDeveloper(Next.js&Laravel) - NMO LLC,Aleppo,Syria

On-site, Full-time | May 2026 - August 2026

- Served as the primary backend developer, responsible for backend development across multiple web applications using Laravel.
- Designed and implemented RESTful APIs, relational database structures, authentication, authorization, validation, transactions, and core business logic.
- Designed database schemas and ERDs independently according to business requirements and system workflows.
- Defined backend architecture and coding standards, applying appropriate architectural patterns according to project requirements.
- Participated in client meetings to gather requirements, analyze business workflows, and discuss technical solutions.
- Collaborated with frontend and UI/UX teams to integrate APIs and coordinate backend requirements; worked with Git/GitHub, Jira, Postman, and Swagger.

Projects:

MK-CADMS - Competency Assessment & Development Management System

Description: Competency and talent management platform covering organizational structure, employee development, assessments, skill gaps, IDPs, and LMS.

- Led backend development of a competency and talent management REST API with 80+ endpoints; designed the database, ERD, backend architecture, and core business logic independently.
- Developed modules covering organizational structure, employees, competencies, assessments, skill gaps, IDPs, LMS, and analytics.
- Implemented assessment state workflows, competency snapshots, and automatic skill-gap generation.
- Implemented 36 permissions across 6 roles, including role-based and object-level access control; applied modular architecture, Action/Query/Service layers, and state machines.

Tabkhatna - Meal-Kit & Recipe Delivery Platform

Description: Meal-kit and recipe delivery platform covering recipes, orders, inventory, packing, delivery, payments, and promotions.

- Led backend development of a Laravel API covering recipes, orders, inventory, packing, delivery, payments, and promotions.
- Implemented transactional order workflows, state transitions, inventory allocation, checkout, cancellation, and delivery operations.
- Developed FEFO inventory allocation, dynamic recipe pricing, WhatsApp OTP, and payment workflows. - Applied modular monolith architecture, CQRS-lite, Action/Query classes, and service layers; developed automated feature and lifecycle tests; delivered to client.

NexTalk - Real-Time Chat & Audio/Video Calling Platform (Final Project, MiDAD Diploma)

- Built a real-time messaging and audio/video calling platform using Laravel Reverb and WebRTC, with signaling for offer/answer/ICE exchange and a call state machine.
- Designed event-driven communication using private and presence WebSocket channels, with transaction-aware broadcasting to prevent race conditions.
- Built centralized frontend real-time state synchronization by updating TanStack Query caches directly from WebSocket events.

School Administration System

Laravel 12, MySQL, Blade, Tailwind CSS, Breeze

- Developed a Laravel-based school management system with enforced academic and enrollment business rules, including capacity restrictions, teacher assignment conflict prevention, and automated student promotion.

TECHNICAL SKILLS

Backend: PHP, Laravel 11/12, REST APIs, Laravel Sanctum, Laravel Breeze, Eloquent ORM, API Resources

Frontend: React, Next.js 15, TypeScript, JavaScript (ES6+), Blade, Tailwind CSS, Bootstrap, HTML5, CSS3

Architecture & Design: Modular Architecture, Modular Monolith, CQRS-lite, Action/Service Layers, Repository Pattern, Gateway Pattern, State Machines, Event-Driven Architecture, Snapshot Pattern, MVC

Real-Time: Laravel Reverb, WebSockets, Laravel Broadcasting, WebRTC Signaling

State & Forms: Zustand, TanStack Query / React Query, React Hook Form, Zod

Databases: MySQL, PostgreSQL, SQLite, Eloquent ORM, Relational Database Design

Auth & Authorization: Laravel Sanctum, Laravel Breeze, Spatie Permission, Role-Based Access Control

Testing & Tools: PHPUnit, Postman, Swagger, Git, GitHub, Jira, Composer, npm, Vite, Laravel Telescope, K6

Other: Spatie Media Library, Spatie Activity Log, Laravel Scout, Meilisearch, Twilio WhatsApp OTP, Laravel Localization, i18next

EDUCATION

B.Sc. in Information Engineering - 5th Year, Aleppo University, Faculty of Information Engineering

TRAINING & PROFESSIONAL DEVELOPMENT

Full Stack Web Development Diploma - MiDAD (Ta'leem Bela Hodood | Alf Mubarmij) | April 2025 - September 2026
Intensive full-stack training focused on Laravel and Next.js.

TECH50K – DevOps Training Program Syrian British Professionals Network (SBPN) August 2026 – Present
Professional training focused on DevOps practices, tools, and workflows.

VOLUNTEER EXPERIENCE

VolunteerDataAnalyst - SanadYouthCenter | April 2026 - Present

- Collected, cleaned, organized, and analyzed datasets for reporting and stakeholder use.
- Collaborated with relevant stakeholders while maintaining data confidentiality and accuracy.
